

KOMBAX Migrations Guide

Safe data migration for Clubs, Federations and Brands

KOMBAX Migrations analyzes files and prepares a migration proposal. It never imports data automatically without review.

Workflow

1. Upload readable Excel, CSV, PDF or image files.
2. Review detected fields, duplicates and issues.
3. Confirm the proposal before any authorized import.
4. Keep the original file as an audit reference.

Privacy / Security

Do not include passwords, card data, CVC, API keys or secrets. Documents should contain only the information required for migration.

Scope

User-created content remains in its original language. Interface language never changes IDs, relationships or permissions.

Review

If a file cannot be interpreted safely, KOMBAX flags it for human review.

KOMBAX Migrations is an operational assistant. A translated interface does not change jurisdiction, legal validity or data permissions.
